# DRY-AIR HAMMAM

## TRADITIONAL HAMMAM

This treatment helps to transform the body and restore peace of mind. The ritual consists of time in the sauna and natural body exfoliation with a kese glove, which removes dead skin cells and gives the skin a smooth effect. A light soap foam massage while lying on a warm marble bed relaxes and soothes the whole body. Time in the relaxation area allows you to enjoy the restored harmony of body and mind.

## LUXE HAMMAM

This ritual is like a luxurious aroma journey to Morocco, which begins under the warm shower. The application of black soap and time in the sauna relaxes the muscles and helps open the pores. The ritual continues in the dry-air hammam performing a deep body scrub with a glove or aromatic oil salt. To infuse the skin with minerals the whole body is covered with volcanic clay and herbs. The honey-flower mask and prickly pear argan serum nourish the facial skin with vitamins, and the head massage, using hair-strengthening oil, relaxes the scalp. The ritual ends by gently massaging in a luxurious mix of oils all over the body to soften, nourish and tone the skin.

## SELF-ADMINISTRED HAMMAM

An introductory ritual to an authentic Moroccan hammam. You are given body care products to enjoy the treatment independently. To prepare the skin for deep exfoliation, we recommend warming up the body in the shower followed by the time in the sauna and application of the black soap enriched with eucalyptus. After relaxing the muscles, follows body exfoliation with a glove or flower salt and aromatic volcanic, herbal clay, which absorbs impurities from the skin and soothes it. The ritual is completed by applying premium-class argan oil, which smoothes, nourishes and saturates the skin with vitamins.
